N232TB Emergency Extraction Information

Todd Rudberg

Undaunted Airshows - Wing

Emergency Contact – Valerie Villacin 206.465.9426

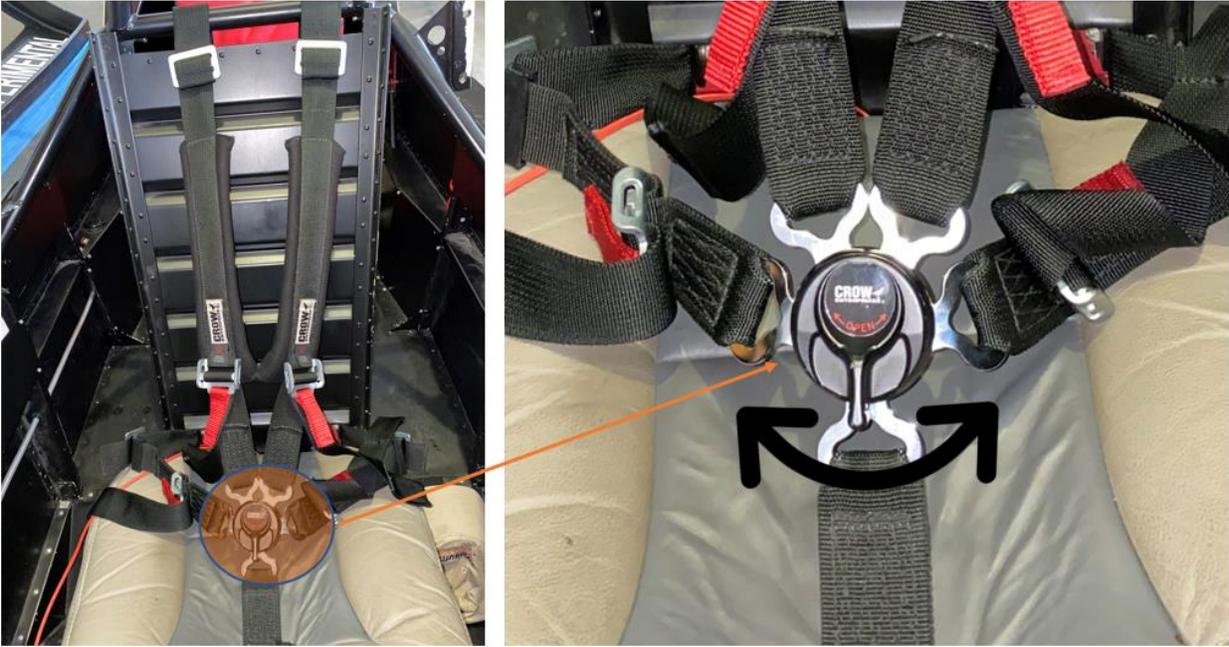

Egress Procedure:

- 1) Flip aft end of canopy latch upward and raise canopy. If canopy is jammed, break the canopy near the rear and clear it out of the way by breaking it forward as in peeling a boiled egg.
- 2) The 5 point harness is a CROW latch. Turn the latch in any direction and the harness will release.
- 3) Grab pilot by the parachute harness and pull him out.
